Int. J. Pres. Ves. & Piping **48** (1991) 377–378

CONTENTS OF VOLUME 48

Number 1

Toughening Analysis for Warm Prestressing 1
FAN XUEJUN & YU SHOUWEN (People's Republic of China)

Stress Intensity Factors of Semi-Elliptical Cracks in Single- or Double-Layered Spherical Shells 9
G. VALENTIN & D ARRAT (France)

Residual Stresses Analysis for Actual Material Model of Autofrettaged Tube by Non-linear Boundary Element Method 21
LIU YONG & SHEN NAIJIE (People's Republic of China)

Optical Observations of Fatigue Crack Growth Behaviour of a Low-Alloy Pressure Vessel Steel in High-Temperature Pressurized Water 37
Y. KATADA, N. NAGATA & S. SATO (Japan)

Contact Stress Analysis of Two Unequal-Length Interference-Fit Tubes By Axisymmetric Boundary Element Method 53
LIU YONG & SHEN NAIJIE (People's Republic of China)

A Parameter Study of Rigid Lateral Nozzles in Cylindrical Shells 65
GREGORY N. BROOKS (USA)

Plastic Collapse of Pipe Bifurcation 79
SAMO MIKLUŠ & FRANC KOSEL (Yugoslavia)

Design of Optimum High-Pressure Monobloc Vessels 93
L. VARGA (Hungary)

Mechanical Analysis of the Elastic Buckling of an Orthogonal Anisotropic Circular Conical Shell under Uniform External Pressure 111
ZHOU HUA & LIU DONGXING (People's Republic of China)

Announcements 123

Number 2

Strength and Ductility Dependence After Prior Deformation of a Type 316 Austenitic Stainless Steel 125
K. G. SAMUEL, S. L. MANNAN & V. M. RADHASKRISHNAN (India)

Growth and Coalescence of Fatigue Cracks at Weld Toes in Steel 129
J. L. OTEGUI (Argentina), D. J. BURNS, H. W. KERR & U. H. MOHAUPT (Canada)

Int. J. Pres. Ves. & Piping (**48**) (1991)—© 1991 Elsevier Science Publishers Ltd, England. Printed in Northern Ireland

Life Prediction by the Iso-stress Method of Boiler Tubes after Prolonged Service 167
OSAMU KANEMARU, MASARU SHIMIZU, TOSHIO OHBA, KOICHI YAGI, YUHEI KATO & KENJI HATTARI (Japan)

Parametric Study of Peak Circumferential Stress at the Saddle Support 183
ONG LIN SENG (Singapore)

Toroidal Elasticity Stress States for an End Normal Force Acting on an Elbow . 209
H. A. LANG (USA)

The Deformation and Fracture of a Cracked Steel Pressure Vessel 229
D. J. SMITH (UK) & J. R. GORDON (USA)

Number 3

In-service Determination of Acceptable Defect Sizes in VVER-1000 Reactor Vessel Metal 253
A. GHETMAN, L. JUDIN, L. SHTENTSAIG, L. BABKIN & A. BORINTSEV (USSR)

Fracture Toughness and Defect Assessment of Low-Temperature Carbon Steel Flanges 263
R. A. BARTLETT, S. R. FROST & P. BOWEN (UK)

Effect of Variable Single Cycle Peak Overload on Fatigue Life 293
RAGHUVIR KUMAR (India)

A Damage Mechanics Approach to the Prediction of Creep Crack Growth . . . 305
ZHENGDONG WANG & DONGDI WU (People's Republic of China)

The Effect of Proof Testing on the Behaviour of Two Stainless Steel Pressure Vessel Drumheads 321
D. N. MORETON & D. G. MOFFAT (UK)

Three-Dimension Flaw Detection for the Welded Seams of Pressure Vessels . . 331
LIU FA-HONG, WANG BO & LIU XIAO-JUN (People's Republic of China)

Stability Determination of Structures under Groups of Loads by Using the Principle of Critical Energy 343
VALERIU V. JINESCU (Romania)
